

## Research and Scholarly Integrity

All members of MSU share responsibility to assure that misconduct or fraud in research and creative activity is dealt with effectively and that MSU's high standards for scholarly integrity are preserved.

However, faculty members have a special responsibility in upholding and promoting high standards in science. They should serve as role models for their students and for fellow researchers, and they should exemplify responsible practices in their teaching and their conversations with others. Faculty have a professional obligation to create positive research environments and to respond to concerns about irresponsible behaviors.

#### Key Principles

Integrity in research and creative activities embodies a range of practices that includes:

- Honesty in proposing, performing, and reporting research
- Recognition of prior work
- Confidentiality in peer review
- Disclosure of potential conflicts of interest
- Compliance with institutional and sponsor requirements
- Protection of human subjects and humane care of animals in the conduct of research
- Collegiality in scholarly interactions and sharing of resources
- Adherence to fair and open relationships between senior scholars and their coworkers
